Viewgraphs on Project JP-15

Mr. Lundahl called Col. Eldridge and informed him that he could not make him a retention set of the viewgraphs in connection with the JP-15 Project, but that he would give him these things on almost indefinite loan. However, he might have to ask for them back once in a while to use in some briefing which our people might be called upon to give. Col. Eldridge was very happy with this arrangement and thanked PIC for its courtesy in setting it up. Mr. Lundahl also discussed this arrangement with Mr. Amery and it was the method which Mr. Amery agreed to be the best one in order to accomplish Air Force wishes in the repeated use of our working materials.
